FOR IMMEDIATE RELEASE – 3/16/07

VLS Releases Urban Analyst™ for ArcGIS

MISSOULA, MT – VLS is pleased to announce the release of Urban Analyst, the third software in its product line which also includes Feature Analyst® and LIDAR Analyst®. Coinciding with the release of Urban Analyst is the availability of all three VLS software, bundled together as VLS Software Suite™, extending the ArcGIS platform as an all-inclusive map making solution for the GIS industry.

Urban Analyst deeply strengthens the VLS product line by accentuating the automated feature extraction (AFE) capabilities of the other two VLS software. Urban Analyst benefits Feature Analyst and LIDAR Analyst users with the ability to fully explore interactive, three-dimensional urban models with advanced visual support for planning, rehearsal, and training objectives.

Although Urban Analyst is new to the public, "it is a proven solution that has been deployed and operational within federal geospatial and intelligence agencies tasked with global geospatial mapping and intelligence, event/mission planning, security operations, and real-time situational awareness," said Dr. David Opitz, chief executive officer at VLS.

VLS Software Suite delivers a complete solution to manage geospatial imagery and information: image analysis, interpretation, and visualization. Free evaluation copies of all three VLS software, including tutorials, are available at www.vls-inc.com.

About VLS

VLS is the international leader in automated image mapping and image intelligence solutions. VLS' product line includes Feature Analyst®, LIDAR Analyst®, and Urban Analyst™. These award-winning software products provide solutions for all branches of the military, as well as other federal agencies, state and local governments, hundreds of colleges and Universities, and commercial mapping companies both domestically and abroad. VLS is a wholly owned subsidiary of Overwatch Systems, a Textron Systems Company. More information can be found at www.vls-inc.com.

Feature Analyst, LIDAR Analyst, Urban Analyst, and VLS Software Suite are trademarks or registered trademarks of Visual Learning Systems, Inc. or Overwatch Systems in the USA and/or other countries. All other brand names, product names, or trademarks belong to their respective holders.
